index.html ..... 339 lines
styles.css ..... 1346 lines
script.js ..... 236 lines
worker.js ..... 213 lines

Run it: put the three files in one folder and open `index.html` — no install or build step. Replace the three `href="#"` Register links (search for “Replace href with your Google Form link”) with the Google Form URL to go live. A deployment appendix (Cloudflare Worker + manifest) follows the source.

    <h2 class="section-title reveal">What is <span class="hl">HackHeist</span>?</h2>
    <p class="about-text reveal">
      HackHeist is a developer-focused event by <strong>GDG on Campus MIET</strong> where
      students don't just listen — they <em>build</em>. Over one power-packed day you'll pick up
      practical skills in hands-on <strong>workshops</strong>, hear war stories from
      <strong>tech sessions</strong>, then team up with your crew for a fast-paced
      <strong>hackathon</strong> to turn ideas into working products. It's a place to learn,
      break things, solve real problems, and connect with a community of curious developers
      who ship.
    </p>
